METALKA MAJUR

KATALOG PROIZVODA
PRODUCT CATALOGUE

35 YEARS 1986–2021

long traditions

Preduzeće Metalka Majur osnovano je 1986. godine i tokom tri decenije postojanja od male zanatske radionice razvilo se u modernu evropsku kompaniju. Metalka Majur je 2020. godine promenila vlasničku strukturu i danas zapošljava 100 radnika.
Metalka Majur je tržišni lider u proizvodnji elektro galanterije u regionu Jugoistočne Evrope. Proizvodi iz programa Metalke Majur prisutni su kako na evropskom tako i na tržištu Bliskog istoka, a konstantno se radi na osvajanju novih tržišta.
Proizvodni program Metalke Majur može se grupisati u nekoliko celina:

- Sklopke i priključnice za ugradnju u zid
- Sklopke i priključnice za ugradnju na zid
- Modularni program sklopki i priključnica
- Modularna LED rasveta
- Razvodne table
- Razvodne kutije
- Elektroinstalacioni pribor

Vizija Metalke Majur je da bude značajna regionalna kompanija u Jugoistočnoj Evropi. Misija Metalke Majur satkana je u kvalitetu i lepoti detalja kojim korisnik pokreće svoje izvore energije, toplote i svetlosti.

The company Metalka Majur was founded in 1986. For almost three decades of work it has developed from a small craft workshop into modern European company. Metalka Majur changed its ownership structure in 2020 and today employs 100 workers.
Metalka Majur is a market leader in production of electrical installation materials in South-East Europe. Products from the Metalka Majur are present in both the European and the Middle East market.
Production range of Metalka Majur can be divided in several groups:

- Switches and socket-outlets for flush assembling
- Switches and socket-outlets for surface assembling
- Modular program of switches and socket-outlets
- Modular LED lighting
- Distribution panels for MCBs
- Junction boxes
- Electrical accessories

Metalka Majur's vision is to be the most important regional company in South-East Europe.
Mission of Metalka Majur is contained in the quality and beauty of detail which serve to the customer to trigger his sources of energy, heat and light.

Primenjujući evropske standarde u kompletnom procesu stvaranja proizvoda Metalka Majur je zauzela dobru startnu poziciju za utakmicu na evropskom tržištu. Kvalitet je potvrđen u Rusiji (GOST), Hrvatskoj (ZIK) i Srbiji (Institut za nuklearne nauke Vinča).

By applying European standards in complete process of making products, Metalka Majur has obtained a good starting position for competing on the European market. As the confirmation of quality, there are many quality certificates issued by European certification bodies: GOST (Russia), Croatia (ZIK) and Serbia (Institute for Nuclear Sciences Vinca).

Rezultat postavljanja razvoja Metalke Majur u funkciju stvaranja kvalitetnih proizvoda su znaci kvaliteta:
Results of putting development of Metalka Majur in function of creating high quality products are signs of quality:

Srpski znak usaglašenosti;
Serbian mark of conformity;

Znak kvaliteta potvrđen u institutu "Rostest", Rusija;
Quality mark confirmed the institute "Rostest", Russia;

Znak kvaliteta potvrđen u Zavodu za ispitivanje kvaliteta ZIK, Hrvatska;
Quality mark confirmed in the Department of quality testing ZIK, Croatia;

CE znak na proizvodu govori da proizvod ispunjava zahteve direktiva EU i da se na njemu sprovode postupci provere usaglašenosti.
Da bi osigurala stabilnost kvaliteta u proizvodnji, Metalka Majur je 1996. godine uvela i organizovala svoj rad po sistemu menadžmenta kvalitetom ISO 9001. Od tada, pa do današnjeg dana, sistem menadžmenta kvalitetom se uspešno održava, što dokazuje sertifikat izdat od strane JUQS-a i IQNet-a.

CE mark on a product means that the product meets requirements of EU directives and that it undergoes procedures of compliance controls. Quality system certificates (YUQS, IQNet) confirm the repeatability of quality.

CE ISO 9001

Koja je Vaša kombinacija?

What is your combination?

Modularni program elektro galanterije nudi mogućnost da korisnik sam odabere kombinaciju modula od kojih svaki kontroliše određenu funkciju u niskonaponskoj elektro instalaciji, i da ih rasporedi po svojoj želji, a na mnogo manjem prostoru u odnosu na klasične programe.

Modularni program ima niz prednosti. Najočiglednija prednost jeste prostor koji zauzimaju modularne sklopke i priključnice, jer je mnogo manji nego kod standardnih programa. Pored toga, kod standardnih programa, u nizajuće ukrasne okvire uglavnom je moguće smestiti najviše pet proizvoda, dok se kod modularnog programa u ukrasni okvir može smestiti sedam modula. Montaža modularnih sklopki i priključnica brža je i jednostavnija nego kod klasičnih programa.

Modular program range offers to user possibility to choose a combination of modules, where each one controls a specific function in low voltage electrical installations, and to place them according to their wishes, on the much smaller space compared to conventional programs.

Modular program has a number of advantages. The most obvious advantage is the area occupied by the modular switches and sockets, because it is much smaller than standard programs. In addition, with standard programs, in multiple decorative frames mostly is possible to place a maximum five products, whereas in modular programs in the decorative frame is possible to place seven modules. Installation of modular switches and sockets is faster and easier compared with conventional program.

Finalni proizvod
Final product

Montažna kutija (dozna) može biti za montažu u puni (klasični) ili šuplji (gips) zid. Za montažu jednog ili dva modula mogu se koristiti standardne montažne kutije (prečnika 60mm), koje se upotrebljavaju za montažu standardnih sklopki i priključnica.

Mounting box can be used for mounting in solid (classical) or cavity (gypsum) wall. For assembling of one or two modules can be used standard mounting boxes (diameter 60 mm), which are used for assembling of standard switches and sockets.

Montažne kutije za puni zid
Mounting boxes for solid walls

Montažna kutija za šuplji zid
Mounting boxes for cavity (gypsum) walls

Nosač modula služi kao podloga za montažu modula i ukrasnog okvira. Za montažnu kutiju (doznu) vezuje se pomoću vijaka (koji se isporučuju uz nosač modula) ili metalnih šapica (kod nosača modula za jedan i dva modula).
Ukrasni okvir mora odgovarati broju modula za koji je montiran nosač modula. Montira se pritiskom na nosač modula, a jednostavno se skida ručnim odvijačem, pritiskom na zareze sa strane.

Mounting frame serves as a base for assembling of modules and decorative frame. For mounting box is connected with screws (provided with mounting frame) or metal claw (at mounting frame for 1 and 2 modules).
Decorative frame must match to number of modules for which mounting frame is mounted. It's mounting by pressing on mounting frame, and can be easily removed with screwdriver, pressing on the side notches.

MODULES in 5 colors

Tipkala za sklopke i tastere mogu biti širine 1M ili 2M, i dostupna su u beloj, crnoj i zlatnoj boji. Pojedini moduli se mogu kupiti i bez tipkala, a ona se kupuju i montiraju naknadno. Tipkalo širine 2 modula (”2M”) montira se ako je to estetski zahtev klijenta, ili ako u ukrasnom okviru postoji prazno mesto koje se na ovaj način maskira. Drugi način maskiranja praznog mesta u ukrasnom okviru jeste ugradnja praznog modula, koji zapravo predstavlja poklopac za nastalu prazninu. U slučaju potrebe klijent može zameniti samo tipkala i tako dobiti novi vizuelno drugačiji izgled priključnice.

Buttons for switches and push buttons can be 1M or 2M width and are available in white and black colour. Some modules can be purchased without buttons, which can be later bought and assembled. Button which is two modules width (2M) is assembled if that is an aesthetic client's request or if there is a blank place in decorative frame and is masked on this way. Another way of masking the empty place in decorative frame is to put an empty module, which actually represent a cover for the gap.
If needed, the client can replace just buttons and get a new, visually different look, of switches and sockets.

U module sklopki i tastera sa signalnom sijalicom ugrađuje se (lakim ubacivanjem u za to predviđeni otvor) i tinjalica, a u ponudi je nekoliko boja, pa se i boja signalne sijalice može razlikovati za različite grupe potrošača. Prilikom montaže tinjalice važno je obratiti pažnju da se tinjalica montira ispod otvora za signalnu sijalicu.

In modules of switches and buttons with pilot light, lamp is installed (easy to insert into the provided holes), there are several colors to offer, so the color of signal lights may vary for different groups of consumers. When installing lamps it is important to pay attention that lamp is assembled below the hole for signal lights.

Svi artikli Kombo imaju atraktivno pojedinačno pakovanje.
All Kombo items have attractive individual packaging.

PROFI PACK

Za profesionalne korisnike obezbeđeno je grupno pakovanje, takozvani "profi pak" gde se 5 modula veličine 2M ili 10 modula veličine 1M pakuju u zajedničku kutiju, što profesionalnim instalaterima omogućava brži rad. Profi pak je dostupan za najprodavanije module sklopki i priključnica i ima nižu cenu od istog broja modula pakovanih u blister pakovanje.

Decorative frames are packed in small bags, while the group packaging, so called "profi pack" is available for professional users. This packaging can include 5 modules of size 2M, or 10 modules of size 1M, packed all together in small box, which makes work faster for professional installation workers. "Profi pack" is available for the most sold modules of switches and socket outlets, while its price is somewhat lower than the price of the same number of modules packed in blister packs.

	Naziv	Item	Beli/white	Crni/black	Zlatni/gold	Srebrni/silver	Ivory/ivory	Pack

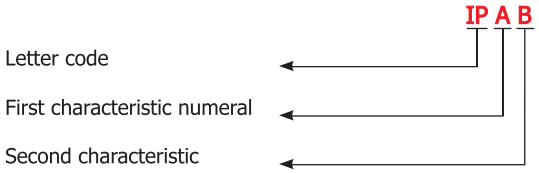
Structure of IP code



When is not required to specify the characteristic number, number is replaced with the letter

IP code elements and their meaning

First characteristic numeral	Brief description	Definition
0	Non-protected	/
1	Protected against access to hazardous parts with back of hand	The object probe, sphere of Ø 50mm, shall not fully penetrate
2	Protected against access to hazardous parts with finger	The object probe, sphere of Ø 12,5mm, shall not fully penetrate in housing
3	Protected against access to hazardous parts with tool	The object probe, sphere of Ø 2,5mm, shall not penetrate in housing
4	Protected against access to hazardous parts with wire	The object probe, sphere of Ø 1,0mm, shall not penetrate at all in housing
5	Protected against access to hazardous parts with wire	Ingress of dust is not totally prevented, but dust shall not penetrate in a quantity to interfere with satisfactory operation of the apparatus or to impair safety
6	Protected against access to hazardous parts with wire	No ingress of dust

Second characteristic numeral	Brief description	Definition
0	Non-protected	/
1	Protected against vertically falling water drops	Vertically falling drops shall have no harmful effects
2	Protected against vertically falling water drops when enclosure tilted up to 15°	Vertically falling drops shall have no harmful effects when the enclosure is tilted at any angle up to 15° on either side of the vertical
3	Protected against spraying water	Water sprayed at an angle up to 60° on either side of the vertical shall have no harmful effects
4	Protected against splashing water	Water splashed against the enclosure from any direction shall have no harmful effects
5	Protected against water jets	Water projected in jets against the enclosure from any direction shall have no harmful effects
6	Protected against powerful water jets	Water projected in powerful jets against the enclosure from any direction shall have no harmful effects
7	Protected against the effects of temporary immersion in water	Ingress of water in quantities causing harmful effects shall not be possible when the enclosure is temporarily immersed in water under standardized conditions of pressure and time
8	Protected against the effects of continuous immersion in water	Ingress of water in quantities causing harmful effects shall not be possible when the enclosure is continuously immersed in water under conditions which shall be agreed between manufacturer and user but which are more severe than for numeral 7

uputstvo za montažu mounting instructions

Priključenje provodnika kod priključnica vrši se pomoću vijaka. Priključenje provodnika kod sklopki, zavisno od tipa njihovog priključka, vrši se pomoću vijaka ili jednostavnim umetanjem blankiranog dela provodnika (dela provodnika sa skinutom izolacijom) u predviđeni otvor. U slučaju vađenja provodnika iz sklopke sa bezvijčanim priključkom potrebno je pritisnuti odgovarajuće dugme čime se provodnik oslobađa iz opružnog kontakta i jednostavno izvuče.

Wiring of a socket outlet is performed by screws. Wiring of a switch depends of switch type (screwless or with screws), and is performed by screws or by simple introduction of blanked wire end (the end with removed insulation) into appropriate gap, following the wiring scheme. In case that the wire should be disconnected from the screwless switch, it is necessary to push the corresponding button, thus releasing the wire from the clamp and then simply draw out the wire.

Sklopke za ugradnju u zid:

1. Isključiti dovod električne energije (osigurač, glavna sklopka);
2. Skinuti tipkalo(a), uklopni i ukrasni okvir sklopke;
3. Pripremiti provodnike za sklopku (skinuti izolaciju u dužini od 10mm);
4. Izvršiti povezivanje pripremljenih provodnika prema odgovarajućoj shemi veze;
5. Podsklop sklopke postaviti u doznu, poravnati ga i pritegnuti vijke na šapicama;
6. Montirati ukrasni i uklopni okvir i tipkalo(a);
7. Uključiti dovod električne energije;

Flush-assembling switches

1. Switch off power supply (safety fuse, the mains);
2. Remove the push-button(s) and built-in, decorative frame;
3. Prepare the wires for connection (remove insulation in length of 10 mm);
4. Connect the prepared wires according to the given wiring scheme;
5. Put the switch subassembly into mounting box, level it and fasten the screws;
6. Mount both built-in, decorative frame and the push button(s);
7. Switch on power supply.

Priključnice za ugradnju u zid:

1. Isključiti dovod električne energije (osigurač, glavna sklopka);
2. Odviti centralni vijak na poklopcu priključnice i skinuti poklopac;
3. Pripremiti provodnike za priključnicu (skinuti izolaciju u dužini od 10mm);
4. Izvršiti povezivanje pripremljenih provodnika prema odgovarajućoj shemi veze;
5. Podsklop priključnice postaviti u doznu, poravnati ga i pritegnuti vijke na šapicama;
6. Montirati poklopac priključnice;
7. Uključiti dovod električne energije;

Flush-assembling socket-outlets

1. Switch off power supply (safety fuse, the mains);
2. Unscrew the cover central screw and remove the cover;
3. Prepare the wires for connection (remove insulation in length of 10 mm);
4. Connect the prepared wires according to the given wiring scheme;
5. Put the socket subassembly into mounting box, level it and fasten the screws;
6. Mount the socket cover;
7. Switch on power supply;

technical details

Switches have terminals which allow secure connection of copper conductors with the following rated surfaces:

Rated current of a switch (A)	Type of connection	Solid conductors (single-wire and multi-wire)	
		Rated surface of cross section of a conuctor mm²	Diameter of the biggest conductor mm²
10	Connection with screws	Od 1 do 2,5	2,13
10	Screwless connection	Od 1,5 do 2,5	2,13
16	Connection with screws	Od 1,5 do 4	2,72
16	Screwless connection	Od 1,5 do 2,5	2,13

No.	Characteristic	Product	Standard	Data
1	Insulation resistance	Switches 10A and 16A	IEC 60669-1	>5MΩ at 500Vdc, 1min
		Socket-outlet 16A	IEC 60884-1	
2	Dielectric strength	Switches 10A and 16A	IEC 60669-1	2000V~ at 50Hz, 1min
		Socket-outlet 16A	IEC 60884-1	
3	Making and breaking capacity	Switches 10A	IEC 60669-1	100 cycles at 12,5A; 275V; cosφ=0,3±0,05
		Switches 16A	IEC 60669-1	100 cycles at 20A; 275V; cosφ=0,3±0,05
4	Breaking capacity	Socket-outlet 16A	IEC 60884-1	50 cycles at 20A; 275V; cosφ=0,6±0,05
5	Normal operation	Switches 10A	IEC 60669-1	20 000 cycles at 10A; 250V; cosφ=0,6±0,05
		Switches 16A		20 000 cycles at 16A; 250V; cosφ=0,6±0,05
		Socket-outlet 16A	IEC 60884-1	5 000 cycles at 16A; 250V; cosφ=0,8±0,05
6	Resistance to heat	Switches 10A and 16A	IEC 60669-1	100±2°C, in a heating cabinet 1h
		Socket-outlet 16A	IEC 60884-1	
7	Ball pressure test	Switches 10A and 16A	IEC 60669-1	125°C - inside parts of insulating material 70°C - outer parts of insulating material
		Socket-outlet 16A	IEC 60884-1	
8	Glow wire test	Switches 10A and 16A	IEC 60695-2-1	850°C - inside parts of insulating material 650°C - outer parts of insulating material
		Socket-outlet 16A		
9	Resistance to tracking	Switches 10A and 16A	IEC 60112	175V, 30s±5s
		Socket-outlet 16A		
10	Resistance to rusting	Switches 10A and 16A	IEC 60669-1	Resistant
		Socket-outlet 16A	IEC 60884-1
